

Westlake Industries – *Leading the Industry with Innovative Technology!*

Maruhide 7 Axis CNC Plasma Pipe Coaster

The Maruhide 7 Axis CNC Plasma Pipe Coaster is the newest addition to Westlake's stable of innovative fabrication equipment. This plasma cutter is truly "state-of-the-art" technology when executing difficult pipe cutting procedures. Originally designed for profile cutting roller-coaster tubing, the Maruhide 7 Axis CNC Plasma pipe cutter can cut clean up through 54" diameter and produces perfectly located, beveled cuts every time.

If your project requires fabricated laterals, mitered tees or any other custom profiled cut, the Maruhide 7 Axis plasma cutter is the pipe cutter of choice. There is no better pipe cutter that is able to provide specialized quality profile cuts at the most efficient costs.

Under-1-Roof Program

High-definition plasma pipe cutting is another step in the advancement of Westlake's **Under-1-Roof program**. This program is designed to reduce out-sourcing and maintain fabrication "in-house". By doing so, we are able to improve supply chain control, increase production efficiencies and ensure on-time delivery.

The Maruhide 7 Axis CNC Plasma Pipe Coaster is one more example of Westlake's commitment to building value through industry leading innovation, technology and service.
